| SUMMARY

Software Engineering Manager and Technical Lead with 15 years of experience building mobile apps and SDKs and leading development teams. I have delivered more than ten production mobile apps, including several designed, built and launched from scratch. I combine hands-on engineering and architecture with technical strategy and team leadership.

At Smile.CX, I lead the development of the Vivocha Mobile SDKs used by enterprise customers across banking, insurance, travel and regulated gaming. I created Covisian's workforce app for more than 27,000 employees and oversee the development of an AI-powered mobile app.

| TECHNICAL SKILLS

Engineering leadership, technical strategy, team growth and mentoring, system architecture, cross-functional delivery, mobile SDK development, AI-powered products, iOS, Android, Swift, Objective-C, Java, C, UIKit, WebRTC, XMPP, Socket.IO, Git, Claude Code, OpenAI Codex.

| PROFESSIONAL EXPERIENCE

Mobile Development Manager @ Smile.CX (Vivocha) | Mar 2018 - Present

Lead a small mobile team and own technical planning and architecture for the Vivocha SDKs. Support hiring and developer growth while leading a full rewrite of the iOS SDK in Swift to remove legacy dependencies and simplify customization.

CTO & Co-Founder @ CoderStreet | Apr 2017 - Dec 2020

Built native SDKs for iOS and Android, enabling audio and video calls in messaging applications through WebRTC and custom signaling.

Mobile Architect @ ShopFully (DoveConviene) | Jan 2016 - Mar 2017

Managed the iOS and Android team leads, defined the mobile technical strategy and guided the development of solutions that contributed to *DoveConviene* reaching No. 1 in the app-store rankings.

Lead Mobile Developer @ Vivocha | Oct 2013 - Dec 2015

Created the iOS and Android SDKs from scratch, with basic iOS integration requiring only two lines of code. Directly supported enterprise customers during SDK integration.

iOS Developer @ Tiscali | Oct 2012 - Oct 2013

Worked as part of the three-person core iOS team behind *indoona*, a VoIP and social networking app that reached approximately 2.5 million registered users and No. 1 in the Italian App Store rankings in 2013.

Lead iOS Developer @ Zetesis | Feb 2011 - Oct 2012

Led the development and release of four iOS apps, including BusFinder for CTM Cagliari. Contributed as a consultant to an early version of *WiPhone* (later *indoona*).

| PERSONAL PROJECTS

Lunette | 2026

Created Lunette, a privacy-focused, offline-first app for watch collectors. It enables users to manage collections and service history, track movement accuracy and follow specialist watch-industry news.

| EDUCATION

Bachelor's Degree in Computer Science | University of Cagliari | 2010
